Re: Complimentary 30-Day AI Voice Pilot, Mercedes-Benz of South Bay

Dear General Manager,

I am Frankie Alicea, Chief Executive Officer of Oraya Corporation, a San Jose-based artificial intelligence company that builds **compliance-first voice automation exclusively for franchised automotive dealerships**. I am writing to personally invite Mercedes-Benz of South Bay to participate in a complimentary 30-day pilot of our AI Voice Platform at zero cost, with zero commitment, and with a clear path to measurable results.

Our platform handles inbound and outbound Service BDC, Sales, and follow-up calls, including scheduling appointments, answering customer questions, and re-engaging open repair orders, while your staff focuses on high-value, in-person interactions. We built Oraya AI because dealerships deserve technology that works *with* their compliance obligations, not around them.

Why Compliance Is Not Optional: It Is Our Foundation

Every AI voice call to or from a California consumer triggers a matrix of federal and state obligations: TCPA prior express written consent, CIPA all-party recording disclosure, CPRA data minimization, FTC bot-identity rules, and Mercedes-Benz's own TISAX security mandate. A single violation can expose a dealership to statutory damages of $500 to $1,500 *per call* under the TCPA and $5,000 per violation under CIPA. Most AI vendors treat compliance as an afterthought; We treat it as architecture.

Our six-vendor stack (Twilio, RetellAI, n8n Cloud, Supabase, Google Vertex AI, and a Vercel-hosted dashboard) carries **SOC 2 Type II certification at every layer**. Our dashboard provider holds **TISAX Level 2 certification**, aligning directly with Mercedes-Benz OEM security requirements under NP.50.14.110. We enforce prior express written consent (PEWC) verification before every outbound call, provide hard-coded AI identity disclosure on every interaction, maintain an immutable consent ledger with row-level security, and automatically purge non-consented data per California law. **Enclosed with this letter is our full Legal & Technical Compliance Verification Report**, prepared to Big Four advisory standard, for review by your counsel and IT leadership.

Pilot Scope & Terms

What we are proposing:

- Full AI voice agent deployment on **one (1) Service BDC line** at Mercedes-Benz of South Bay
- Inbound call handling: appointment scheduling, service status inquiries, hours/location questions
- Outbound follow-up: open repair order re-engagement for consented customers only
- Real-time analytics dashboard with call recordings, appointment conversion tracking, and compliance audit logs
- TCPA/CIPA/CPRA/FTC-compliant call handling with recorded consent gating on every interaction
- Dedicated implementation manager and weekly performance check-ins
- Comprehensive written performance report delivered at Day 30

Pilot terms:

- **Duration:** 30 calendar days from activation date
- **Cost:** $0. No setup fees, no usage fees, no hidden charges
- **Commitment:** None. You may discontinue at any time with 24 hours' written notice
- **Data ownership:** All customer data remains your sole property. Oraya AI acts as a CPRA-defined "service provider" processing data only under your direction
- **Termination:** Upon conclusion or discontinuation, all data is purged within 72 hours with written confirmation

Post-Pilot Scenarios

We believe in earning your business through demonstrated performance. At the conclusion of the 30-day pilot, there are three possible outcomes:

Scenario 1: Results meet expectations. We transition to a production agreement at competitive monthly pricing that is transparent, rooftop-based, and designed for ROI from Day 1. A detailed proposal will be presented at the Day 30 review.

Scenario 2: Promising but needs refinement. We extend the pilot at no cost for up to 15 days to optimize performance and tune call handling to your preferences.

Scenario 3: Not the right fit. You walk away with zero obligation. We purge all data, provide written deletion confirmation, and part on professional terms. All reports remain yours.

How We Measure Success

The Day 30 report will quantify performance across four dimensions: **operational efficiency** (booking rate, handle time, first-call resolution); **revenue impact** (appointments booked, RO re-engagement conversions, recovered missed-call revenue); **customer experience** (satisfaction indicators, transfer rate, escalation frequency); and **compliance posture** (consent verification rate targeting 100%, disclosure delivery, data purge logs, zero-violation attestation).

Enclosed Documentation & Next Steps

Accompanying this letter is our **Post-Implementation Legal & Technical Compliance Verification Report** covering TCPA, CIPA, CPRA, FTC, SB 446, and TISAX analysis with statutory citations, deployed controls, consent scripts, and a residual risk matrix, prepared proactively because dealerships deserve full legal transparency *before* a single AI call is made.

I would welcome the opportunity to schedule a 30-minute call at your earliest convenience to walk through the platform, answer questions from your management, counsel, or IT team, and align on a pilot start date. Mercedes-Benz of South Bay has an exceptional reputation, and we would be honored to support your dealership with technology that matches the standard your customers expect.

Respectfully,

Frankie Alicea
Chief Executive Officer
Oraya Corporation
