WHY NOW: ORAYA AI FOR MERCEDES-BENZ

From Concept to Production-Ready in 6 Months

Six months ago, Oraya was an idea. Today, we have a production-grade AI voice platform that has already generated **$27,000 in revenue in a single week** in an adjacent vertical. We are coming to you with a zero-cost, zero-risk pilot because we believe the results will speak for themselves.

$27K	15-20	<60s	99.5%
Revenue in Week 1 (Insurance Vertical)	Qualified Appointments Per Day	Speed to Lead (Inbound)	Platform Uptime Commitment

What Changed Since We Last Spoke

Technical co-founder joined. Chitraksh Mayank (CTO) brought deep AI infrastructure experience, rebuilt the architecture from scratch, and engineered the proprietary retry system that pushes our outbound reach past 95%.

Platform is production-grade. Fully integrated stack: Retell AI + ElevenLabs voice synthesis + N8N workflow orchestration + Twilio telephony + Google Calendar. Not a demo. Not a prototype.

Insurance case study proves it works. First live deployment generated 15-20 qualified appointments per day, 3-4 policy closings per day, and $27K in revenue in the first operational week.

Compliance is built in, not bolted on. TCPA consent verification, CIPA recording disclosure, FTC bot-identity rules, and CPRA data handling are hard-coded into every call. Full audit trail.

E&O; and cyber liability insurance in place. Professional liability coverage protects both Oraya and the dealership from day one of the pilot.
